If you require additional technical support related to this product seek the assistance of a qualified expert.

Installation

This product may be installed into 1911 series (5") or other compatible handgun as a two piece system. A larger part (cylinder) is installed in the same way as a factory recoil spring guide rod and a smaller part (piston) is installed into the opposite end of the recoil spring. The piston should be positioned within the recoil spring held captive between the recoil spring and a recoil spring plug. After assembly Check for initial clearance and function with an unloaded handgun. Use only with Colt OEM type recoil springs.

Warranty

T.A. Graves warrants this product for a lifetime period and/or duration of this specific product line against breakage resulting from defects in materials or workmanship to any user. T.A. Graves limits liability at replacement of defective parts and is not in any way responsible for consequences of use or abuse. Any modification may void the warranty. Contact T.A.
